

# HIGHRISE

800.328.3332  
satelliteindustries.com

“This restroom is built exclusively for the high rise construction market & offers end users and operators a unique set of features.”

**Portable restrooms preserve and protect our natural resources.**

The Highrise has been designed to be semi or fully private. Adding the roof makes it fully private and a sliding mechanism allows it to be lowered far enough to fit through standard door openings. For additional privacy the urinal is placed inside the restroom. Overall, the Highrise has a tremendous amount of interior space and privacy in situations where it was impossible to have before.

# Construction crews love the Highrise restroom.

## structure

Easy-grip door handle makes it easy to lock and unlock.

Galvanized edges and corners protect against the environment.

Sealed casters with greased bearings will not freeze up.

*Highrise with optional lift kit.*

The Highrise is sized to go where other restrooms cannot. With the optional roof it is only 33.5 inches wide and 78.2 inches high. This allows the Highrise to be moved through halls and doorways to the place where workers need it most. The casters are sealed to prevent freeze up and can be greased for continued reliability. The frame and floor are made from galvanized metal to prevent damage while lifting and handling. This uniquely designed restroom fills the need for privacy, maneuverability, and dependability.

Fold-down roof and door reduce overall height to fit through standard door openings.

FULLY PRIVATE (optional)

SEMI-PRIVATE
